## TRADE MARKS

Years ago, in the days of the open range, cattle owners found it wise to brand their steers with a distinctive mark, making it possible for them to identify their own animals from those of the other ranchers.

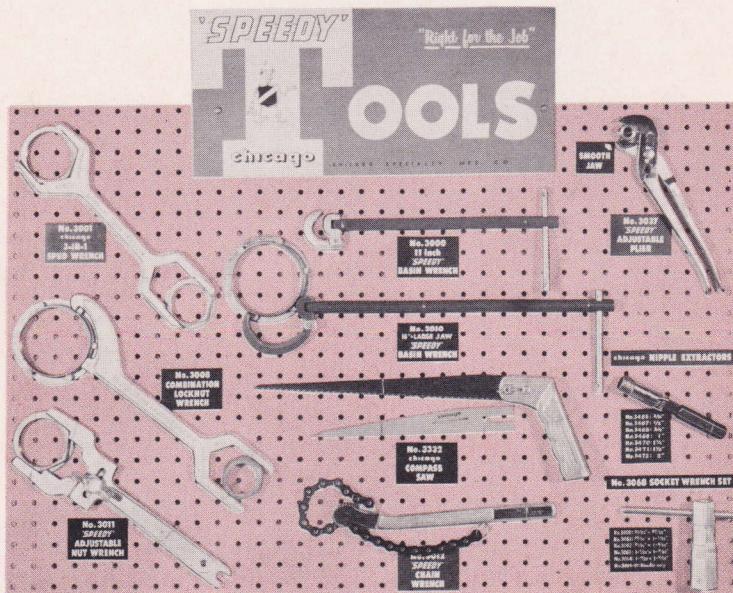

In time, certain brands began to mean finer cattle, better beef on the hoof, and beef buyers looked for these brands.

Things really haven't changed much since then.

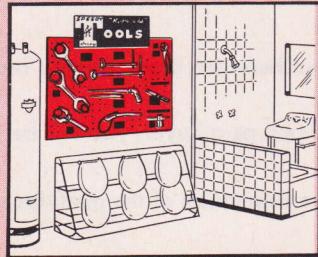

Today we associate certain branded merchandise with quality, and moreover, with the house producing it.

The marks shown here are the registered brands of CHICAGO SPECIALTY MFG. CO. and as a buyer, you can be sure of the quality as well as the reputation of the manufacturer.
